

Group Name: Gopalmath

Project Title: Brain MRI Segmentation

Group Members

Parshwa Shah (AU1940263)

Yash Doshi (AU1940197)

Jay Mehta (AU1940290)

Task Performed this week:

- We implemented the code by understanding various kaggle notebooks.
- We implemented the code with pytorch and supporting libraries but failed to implement it correctly.
- Then we started the implementation of the same with tensorflow, and were successful in generating the results.
- Loss was not improving after the 2nd epoch(it was remaining the same). However that issue was resolved after adding batch normalisation layers

Task for next week:

- Need to improve prediction and work on optimising model
